Key principles

"We, decision makers at all levels of government together with organisations and networks of cities and communities of all sizes, believe that **strong cooperation through multi-level governance in the EU** and **co-creation with citizens** are key to our mission of **turning our cities and communities into smart and sustainable places** where people enjoy living and working."

Cross-domain interoperable digital solutions

Cross-domain interoperable digital solutions are integrated technological systems that facilitate the **seamless exchange and utilization of data across multiple domains** or sectors. These solutions aim to overcome the traditional data silos and promote interoperability between different systems, enabling efficient data sharing and analysis, and decision-making processes.
