Living-in.EU: Shaping Europe's digital transformation together

In an era defined by climate change, digital innovation, and economic transition, our way of life is undergoing profound shifts. These changes impact the way we live, work, and learn, demanding new ways of organization. Technology stands as a vital tool empowering leaders, including mayors, to address the challenges emerging from these transformations. Yet, the magnitude of change necessitates a collaborative approach, by working together at the local and European level.

In response, the Living-in.EU movement was born in 2019, with a resolute mission: to collectively drive the digital transformation across all corners of Europe – from countries, regions and municipalities. The aim is to amplify the advantages of digital solutions through an approach driven by cities and centered around citizens: we champion the concept of cities as open innovation ecosystems.

Embrace a Community that empowers you locally
Living-in.EU invites you to become part of this dynamic community, where your local aspirations find concrete and long-lasting support, ensuring your engagement with the latest technology and compliance with evolving regulations and standards, both today and tomorrow.

What Awaits You?

By signing the declaration, you become part of a European network of municipalities, regions, and countries. Together with the European Commission, we shape Europe's digital trajectory. Here's what you gain:

- **Traillblazing leadership:** Influence Europe's direction by actively participating in its digital evolution.
- **Timely insights:** Stay ahead with firsthand knowledge of the latest developments, enabling swift action.
- **Streamlined solutions:** Access standardized products and services effortlessly, saving you time and effort.
- **Financial clarity:** Discover funding opportunities and effective partnerships.
- **Showcase your impact:** Contribute to development and highlight your successes.
- **Compliance and Security:** Operate within European frameworks and standards for secure and compliant service delivery.

Experience the joy of connection

Beyond benefits, Living-in.EU introduces you to a network of like-minded, forward-thinking colleagues spanning Europe – a space to share ideas, progress, and fellowship.

Your Pace, Your Path

You participate in the movement because you want to. We understand your unique journey and recognize that every municipality or region has its own pace, culture, and dynamics. Joining the movement imposes no obligations; instead, it invites you to explore the possibilities aligned with your goals. What we do ask for is an official agreement from your organization to participate, ensuring you align with the declaration's intent.

Five simple steps to engage:

- 1. Decision time:** Decide within your organization to endorse the declaration.
- 2. Seal the deal:** Register and sign the declaration at <https://living-in.eu/user/register/signatory>.
- 3. Welcome aboard:** Upon confirmation, you become an integral part of the movement.
- 4. Local touch:** Nominate a local contact and engage with the secretariat for guidance.
- 5. Official welcome:** Enjoy an official introduction to the network at a designated moment.

Connect with the heart of Europe's transformation

Join now and connect with more than 150 cities, regions, and countries, alongside 130+ strategic partners, shaping Europe's digital future.

About Living-in.EU:

Inaugurated in 2019, Living-in.EU is an initiative fostered by the European Commission, the Committee of the Regions (CoR), Eurocities, Open & Agile Smart Cities (OASC), European Network of Living Labs (ENoLL), The European Regions Research and Innovation Network (ERINN), and The Council of European Municipalities and Regions (CEMR).

Join Living-in.EU today and co-create Europe's digital narrative!

Cross-domain interoperable digital solutions

Cross-domain interoperable digital solutions are integrated technological systems that facilitate the **seamless exchange and utilization of data across multiple domains** or sectors. These solutions aim to overcome the traditional data silos and promote interoperability between different systems, enabling efficient data sharing and analysis, and decision-making processes.
